

Submit Your Sitemap to Google

Updated: 03.14.25

Once your website is live, Here are five steps to submit a Squarespace website sitemap to Google:

1. **Sign in to Google Search Console** – Go to Google Search Console and sign in with your Free Google Search Console account. (You can choose to do this via your Squarespace dashboard, go to Main Sidebar > Analytics > Keywords or Main Gear Icon > Third Party Tools > Connected Accounts.)
2. **Select Your Website** – Once logged in at GSC, Click on your website property (or add it if it's not there, there is a verification step here).
3. **Find the Sitemaps Section** – In the left menu, click on **"Sitemaps."**
4. **Enter Your Sitemap URL** – Type sitemap.xml at the end of your website URL (e.g., yourwebsite.com/sitemap.xml) and submit it.
5. **Check Submission Status** – Refresh the page to confirm Google has received and processed your sitemap.

That's it! Google will now begin indexing your site, so it can be visible in search results. 🚀
